

Graduation and induction ceremony of IESL

The Annual Graduation and Induction Ceremony of the Institution of Engineers, Sri Lanka (IESL) will be held at 5.30 p.m. on August 15 at the Committee Room 'B' of the BMICH.

A batch of students who have completed all three parts of the degree equivalent part-time engineering course conducted by the IESL will graduate while engineers who have been successful at the professional review will be inducted as chartered engineers.

The IESL is conducting a three-year engineering course in three disciplines

namely civil, mechanical and electrical. Students who do not qualify to enter universities even though successful at the Advanced Level Examination (Mathematical Stream) are eligible to follow this course.

In addition, holders of other engineering diplomas could also register to follow the course.

Lectures are delivered by university academics and senior engineers who serve in the industry. Applications for the course are called in January for the course that commences in February, every year.

Students who successfully complete all three parts of the IESL Engineering Course, are eligible to become Associate Members of the IESL which paves them the way to become corporate Members of the Institution after going through a process of Professional Review.

The Institution of Engineers, Sri Lanka is the only organization in Sri Lanka that holds the right to grant the professional qualification, Chartered Engineer of CEng. Engineers who qualify from universities are required to undergo a pro-

cess of professional review after serving mandatory number of years in the industry in order to qualify as Chartered Engineers. One hundred and eighty seven engineers who obtained their professional qualification as Chartered Engineers during the previous year will be inducted during the ceremony on August 15.

Five winners of the "Junior Inventor of the Year" 2007 competition organised by the IESL will also be awarded scholarships during the ceremony.
