CEB warns of power cuts – Where oh where are the protesting bishops?

CEB warns of power cuts due to lack of hydropower water -reported in your journal of 20.05.2000.

I have in an earlier letter suggested that the Protesting Bishops would in God's name stop their "March of Folly" against the coal fired plant. Would the Venerable Bishops inform the public in bold headlines - their solution to power cuts in the future. Would they kindly provide the funds for alternative "money guz-

zling" projects. Enough is enough -is there no one with the courageous will and foresight to order the commencement of the Coal Power Project.
