IESL

Presentation on safety practices in construction

A presentation on 'Safety in construction - The Australian approach: Lessons to be learnt' will be made at the Institution of Engineers, Sri Lanka (IESL) by Australia based Sri Lankan Engineer Rohan Bandarage.

Rohan Bandarage

The presentation which is organized by the Young Members' Section of the IESL will take place on Monday February 16, at 5.15 p.m. at IESL Auditorium, 120/15, Wijerama Mawatha Colombo 7.

The Presentation will cover the practices adopted in Australian workplace in order to create an environment conducive for positive safety performance. Aspects such as planning for health and safety, hazard identification and control, risk assessment will be covered in the presentation. In addition, legislative framework, responsibilities and authorities, training and competence, employee participation and emergency preparedness will also be discussed.

Although the presentation is targeted at professionals and students in engineering discipline, others such as management and supervisory staff could also benefit as promoting safety culture in workplace would also be discussed.

Eng. Rohan Bandarage, a Sri Lankan engineering graduate has a Masters Degree from Curtin University in Western Australia in Health Safety and Environment. For the past ten years, he has been attached to SAI Global, which is the largest standards certification body in the Asia Pacific Region. Eng. Bandarage is also a guest lecturer at the University of Western Australia.

The Young Members' Section of the IESL invites all to attend the presentation.
