

PURITAS - THE PURIFICATION SPECIALISTS

22nd March 2003 D:Ne

Puritas Ltd is a fully owned subsidiary of Haycarb Ltd and a member of the Hayleys Group of Companies. We partner our clients in protecting the environment by offering customized, innovative solutions to suit specific requirements of waste characteristics, site conditions and budgets. Waste minimization, reuse and recycling is always promoted over end of pipe treatment. Our staff is well qualified in relevant disciplines such as Microbiology, Biochemistry, and Chemical, Civil, Mechanical, and Electrical Engineering. Puritas uses its modern research and analytical laboratory to perform in-house effluent analyses and to run pilot-scale trials to optimize treatment regimes prior to the submission of proposals. Waste water treatment plants have been constructed for a wide range of industries including rubber, food, paint, printing, packaging and hotels.

constructed for a wide range of industries including rubber, food, paint, printing, packaging and hotels.

Treatment plants are automated to minimize operator involvement and have very low operating costs. Plants are handed over only after ensuring that the required standards are met. A comprehensive after sales service including maintenance contracts are offered to clients.

Cost effective solutions are also offered for raw water treatment (including iron removal, softening, deionization and disinfection), noise reduction, solid waste management and disposal, air pollution control, and energy and waste energy management.

In addition Puritas supplies high quality chemicals and technical services for boiler and cooling tower treatment. With over seven years experience in the design, construction and commissioning of over 30 water and waste water treatment plants for a wide range of industries, Puritas has proven itself to be a leader in the field of pollution control.
